DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to organic electroluminescent device, classified in class 313, subclass 506.
- II. Claims 12-20, drawn to method of fabricating an organic electroluminescent device, classified in class 445, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another materially different process such as comprising the steps of forming anode electrode of R unit pixel by subsequent vapor deposition of first and second anode electrodes, then deposition of organic thin film layer of R unit pixel by ink-jet method and then forming anode electrodes of G and B unit pixels by vapor deposition of first and second anode electrodes, forming organic thin film layers of G and B unit pixels by ink-jet method and then forming cathode electrode entirely over the surface of R, G and B organic thin films of R,G and B unit pixels, wherein the thickness of the second

Art Unit: 2879

anode electrode of R pixel is different from that of second anode electrodes of G and B pixels.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Bushnell on February 23, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
